RESPONSE TO NOTICE TO FILE MISSING REQUIREMENTS

Sir:

This paper is submitted in response to the Notice to File Missing Requirements Under 35 U.S.C. 371 in the United States Designated/Elected Office (DO/EO/US), mailed September 26, 2005 ("the Notice"). The Notice indicates that submission of a declaration of the inventors and payment of the late oath or declaration surcharge is required; however, Applicant submits that the Notice was issued in error and should be withdrawn for the reasons discussed below.

The present application is a national stage of a PCT application that was filed using the procedures specified for meeting the declaration requirements for US national stage applications. Enclosed is a copy of the publication bibliography for corresponding International Publication Number WO 2004/036941A2, published on April 29, 2004, which indicates the Declaration of inventorship was filed under **PCT Rule 4.17**. Accordingly, Applicant submits that the application meets the requirement for an oath or declaration of the inventors. Applicant therefore requests withdrawal of the Notice without further charges.

No fee is believed due as the Notice was issued in error. If any extension of time for the accompanying response or submission is required, Applicant requests that this document be considered a petition therefor. The Commissioner is hereby authorized to charge any deficiency or credit any refund to Deposit Account No. 50-0220.

Respectfully submitted,

D. Scott Moore

(54) Title: METHOD AND DEVICE FOR DOWNLOADING SETTINGS FOR AN APPLICATION

(57) Abstract: The invention relates to a method for downloading settings for an application into a device e.g. facilitating a request for subscription to a service. The invention also relates to such a device. The device is programmed in dependence of at least one predetermined application, such that the device is adapted to display a menu in which a user may navigate, the menu being associated with said application and guiding the user. The device is actuated by means of a keystroke while in said menu causing the device to contact a server and download the settings for the application. Preferably, the device contacts the server over the air by calling a telephone number loaded into the device and associated with said application, and a session is established with the server, wherein questions and answers are presented in further menus in the device. Thus, the device is prepared by providing customised application specific menus, which are self-instructing and user friendly. The menus guide a user to select the required keystrokes, the number of which is as low as possible.
